

## Phase1 Feedback

General Comments	Overall Design (25 marks)
Class Diagram	<ul style="list-style-type: none"> <li>Class diagram → 5 marks (2 marks classes, 3 marks relationships)</li> </ul>
General Class implementation <ul style="list-style-type: none"> <li>Relevant attributes</li> <li>Inheritance/Aggregation/Composition/Interface</li> <li>Implemented based on Object Oriented Concepts.</li> </ul>	<ul style="list-style-type: none"> <li>Class Admin → 2 marks</li> <li>Class Train → 3 marks</li> <li>Class Passenger → 3 marks</li> <li>Class Route → 3 marks</li> <li>Class Ticket → 2 marks</li> <li>Class Booked_Tickets → 3 marks (different implementations are accepted)</li> <li>Class Station or Main (that involves collections of trains, admins and Passengers) → 2 marks.</li> <li>Any example of Inheritance/Aggregation/Composition/Interface. → 2 marks</li> </ul>
<b>Methods that should be provided for Admins</b>	<b>Detailed design of each class (50 marks)</b> <b>Notes → Display methods just take maximum 1 mark</b> <b>Notes → methods should be in suitable classes according to OO concepts, not all in one class or in Main class</b>
<ul style="list-style-type: none"> <li>Manage Account               <ul style="list-style-type: none"> <li>Search for a specific admin from the collection and update the required information.</li> </ul> </li> </ul>	3 marks: <ul style="list-style-type: none"> <li>2 marks for correct search</li> <li>1 mark for correct update.</li> </ul>
<ul style="list-style-type: none"> <li>Add Train:               <ul style="list-style-type: none"> <li>The method should take the information of the new train.</li> <li>Add the train as an object in the Trains collection.</li> </ul> </li> </ul>	4 marks: <ul style="list-style-type: none"> <li>2 marks for taking correct information and passing correct parameters.</li> <li>2 marks for adding in trains' collection.</li> </ul>

<ul style="list-style-type: none"> <li>Remove Train: <ul style="list-style-type: none"> <li>Search for the train to be removed within the collection.</li> <li>Remove the train from the collection.</li> </ul> </li> </ul>	4 marks: <ul style="list-style-type: none"> <li>2 marks for correct search</li> <li>2 marks for removing.</li> </ul>
<ul style="list-style-type: none"> <li>Update Train stored data: <ul style="list-style-type: none"> <li>Search for the specified train within the collection.</li> <li>Update the train data.</li> </ul> </li> </ul>	4 marks: <ul style="list-style-type: none"> <li>2 marks for correct search.</li> <li>2 marks for update.</li> </ul>
<ul style="list-style-type: none"> <li>Generate Reports: <ul style="list-style-type: none"> <li>The method should search in the booked collection for the booking of a certain route.</li> <li>The method should calculate the total fare of this route by summing up the fares collected.</li> <li>The method should display the total number of bookings and the total fare collected.</li> </ul> </li> </ul>	6 marks: <ul style="list-style-type: none"> <li>2 marks for first point.</li> <li>2 marks for second point.</li> <li>2 marks for third point.</li> </ul>
<b>Methods that should be provided for Passenger.</b>	
<ul style="list-style-type: none"> <li>Create Account: <ul style="list-style-type: none"> <li>The method should add the new Passenger in the collection of Passengers.</li> </ul> </li> </ul>	4 marks: <ul style="list-style-type: none"> <li>2 marks for taking input.</li> <li>2 marks for adding in collection.</li> </ul>
<ul style="list-style-type: none"> <li>Manage Account <ul style="list-style-type: none"> <li>Search for a specific passenger from the collection and update the required information.</li> </ul> </li> </ul>	3 marks: <ul style="list-style-type: none"> <li>2 marks for correct search</li> <li>1 mark for correct update</li> </ul>
<ul style="list-style-type: none"> <li>Book a ticket: <ul style="list-style-type: none"> <li>The passenger should select origin and destination of a route, timing slot and seat number from the available seats.</li> <li>The method should add the new booking to the Booked collection.</li> <li>The passenger should be allowed to reserve more than one seat.</li> </ul> </li> </ul>	6 marks: <ul style="list-style-type: none"> <li>2 marks for first point.</li> <li>2 marks for second point.</li> <li>2 marks for third point.</li> </ul>
<ul style="list-style-type: none"> <li>Cancel Booking: <ul style="list-style-type: none"> <li>The method should search the booked collection for the one to be canceled.</li> <li>The canceled booking should be removed from the booked collection.</li> <li>The seats should be made available again.</li> </ul> </li> </ul>	6 marks: <ul style="list-style-type: none"> <li>2 marks for first point.</li> <li>2 marks for second point.</li> <li>2 marks for third point.</li> </ul>
<ul style="list-style-type: none"> <li>Update Booking:</li> </ul>	6 marks:

<ul style="list-style-type: none"> <li>– The method should search the booked collection for the one to be updated.</li> <li>– Cancel booking method could be called (or it is implemented again).</li> <li>– Book a ticket method could be called (or it is implemented again)</li> </ul>	<ul style="list-style-type: none"> <li>- 2 marks for first point.</li> <li>- 2 marks for second point.</li> <li>- 2 marks for third point.</li> </ul>
<ul style="list-style-type: none"> <li>• View tickets: <ul style="list-style-type: none"> <li>– The method should display for the passenger his list of booked tickets by displaying his collection of booked tickets.</li> </ul> </li> </ul>	4 marks
<b>Proper use of Collections</b>	<b>Proper use of Collections (12.5 marks)</b>
<p>Collections needed:</p> <ul style="list-style-type: none"> <li>- A collection for Admins</li> <li>- A collection for Passengers</li> <li>- A collection for Trains</li> <li>- A collection of Train_routes</li> <li>- A collection of tickets_per_route.</li> <li>- A collection for Booked tickets (different implementations are accepted)</li> </ul>	2 marks for each collection, but booked tickets 2.5
<b>Class Implementation and Testing in main</b>	<b>Class Implementation &amp; Testing in main (12.5 marks)</b>
<ul style="list-style-type: none"> <li>• Login: <ul style="list-style-type: none"> <li>- Displaying menus should be based on the correct login</li> </ul> </li> </ul>	1.5 marks for two different Access level.
<ul style="list-style-type: none"> <li>• Test all methods : <ul style="list-style-type: none"> <li>- A scenario for calling 11 essential methods</li> <li>- Insert meaningful data for testing.</li> <li>- Using appropriate display methodology</li> </ul> </li> </ul>	Calling 11 essential methods in appropriate scenario → 11 marks.
